.Cubik by ingenium
The CUBIK series devices have a capacitive touch glass surface with LED indicators. They are available in a wide range according to the customization level required. Its design can be adapted to any environment, widely fitting all needs.

**push-buttons**
The new CUBIK series has several models with different number of touch areas. A LED light indicator is associated with each of these areas. There are two sizes depending on the model: square format and vertical rectangular format. They incorporate built-in temperature and humidity sensors capable of sending the information to the KNX® BUS.

One of the main advantages is its compact design. Only 6mm in thickness favor a very aesthetic and functional surface installation.

Easy mounting with two screws directly on wall or on universal mechanism box. A standard connector on the back provides power and communication with a KNX® protocol home automation system.

**thermostats**
With or without graphical interface. They include temperature and humidity sensors.

A hi-tec home automation with customizable design

Devices available with the back casing in WHITE or BLACK, within a range of up to 3 levels of customization:

1. **basic**
   - Front glass fixed, white or black.

2. **design**
   - Front glass fixed, print customizable.

3. **capriccio**
   - Front glass interchangeable*, print customizable.

Additional Capriccio range custom glasses can be purchased separately.

*The glass is fixed to the rear with a practical and effective magnets system that enables an easy exchange.
